This area is bounded to the east by North Coast Ridge Road and includes all residents and businesses on Dolan Ridge Road.
- Evacuation Order: Coast Ridge Road from mile marker 1.5 to Marble Peak at the end of the road.

FIRE ACTIVITY

Soup Complex, Vegetation Fire, Modoc County

Soup Springs, 12 miles east of Likely, Modoc National Forest

Federal DPA, FRA

Per CAL FIRE, Cal OES Duty Officers, and ICS-209 [as of 09/19/16 at 0552 hours](#):

- 856 Acres, 0% Contained
- Expected containment 10/31/16
- Hold and improve line on the Soup (105 acres)
- Continued line construction on the Soup 2 (750 acres)
- 3 fires are a .25 acre or less and are in mop up status
- No threats
- Continued commitment of CAL FIRE ground resources

FIRE ACTIVITY

Willard, Vegetation Fire, Lassen County

Location: Willard Creek Road, 10 miles West of Susanville, South of Hwy 36

Jurisdiction: State DPA, SRA

Type 1 IC

Per CALFIRE and Cal OES Duty Officers as of 09/18/16 at 1814 hours:

- 2,575 Acres, 95% Contained
- Expected Containment 09/21/2016
- 2 Single Residences; 5 Minor Structures Destroyed
- Hold and improve control lines, mop-up.

Deployments

- 1 Cal OES Fire Assistant Chief (5213)
- 1 Public Safety Communications (PSC) Technician

Resources Assigned

- 2 Local Government Water Tenders

FMAG

- On 09/11/16 at 2140 hours an FMAG was received and placed on hold.

Mission

2016-FIRE-26702

- CNA Armory Susanville and staff tasked to support Willard Fire Incident
- Facility used to support Incident Command Post

Recovery

- Lassen County is in the process of preparing Initial Damage Estimates (IDEs).
- A Cal OES Inland Region Emergency Services Coordinator (ESC) has been coordinating with Lassen County OES, and no assistance has been requested to date.

FIRE ACTIVITY

Owens River, Vegetation Fire, Inyo County

Location: Clark Canyon, north of Mammoth Lakes, east of Highway 395

Jurisdiction: Federal DPA, FRA

Start time: 1349 hours on 09/17/16

Type 3 IMT

Per CAL FIRE, Cal OES Duty Officers, and ICS-209 [as of 09/18/16 at 2130 hours](#):

- 6,000 Acres, 20% Contained
- Expected Containment - 09/30/2016
- 8 Residential and 8 Minor Structures Threatened
- 4 Minor Structures Destroyed
- Threat to Sage Grouse Habitat, High use recreational area
- Continue direct line construction to secure fire edge adjacent to structures

Resources Assigned

- 15 Local Government Engines
- 1 Local Government Water Tender

Deployments

- 1 Cal OES Fire Branch Assistant Chief

Canyon, Vegetation Fire, Santa Barbara County

Santa Ynez Ridge Rd & Egress Rd, south side of Vandenberg Air Force Base

Federal DPA, FRA-DOD

Type 3 IMT

Per CAL FIRE, Cal OES Duty Officers, and ICS-209 [as of 09/19/16 at 0600 hours](#)

- [4,528 Acres, 0% Contained](#)
- Fire is in a restricted unexploded ordnance area
- Nonresidential commercial property threatened
- CAL FIRE Agency Rep assigned
- Commitment of CAL FIRE air and ground resources

WEATHER SYNOPSIS BY REGION

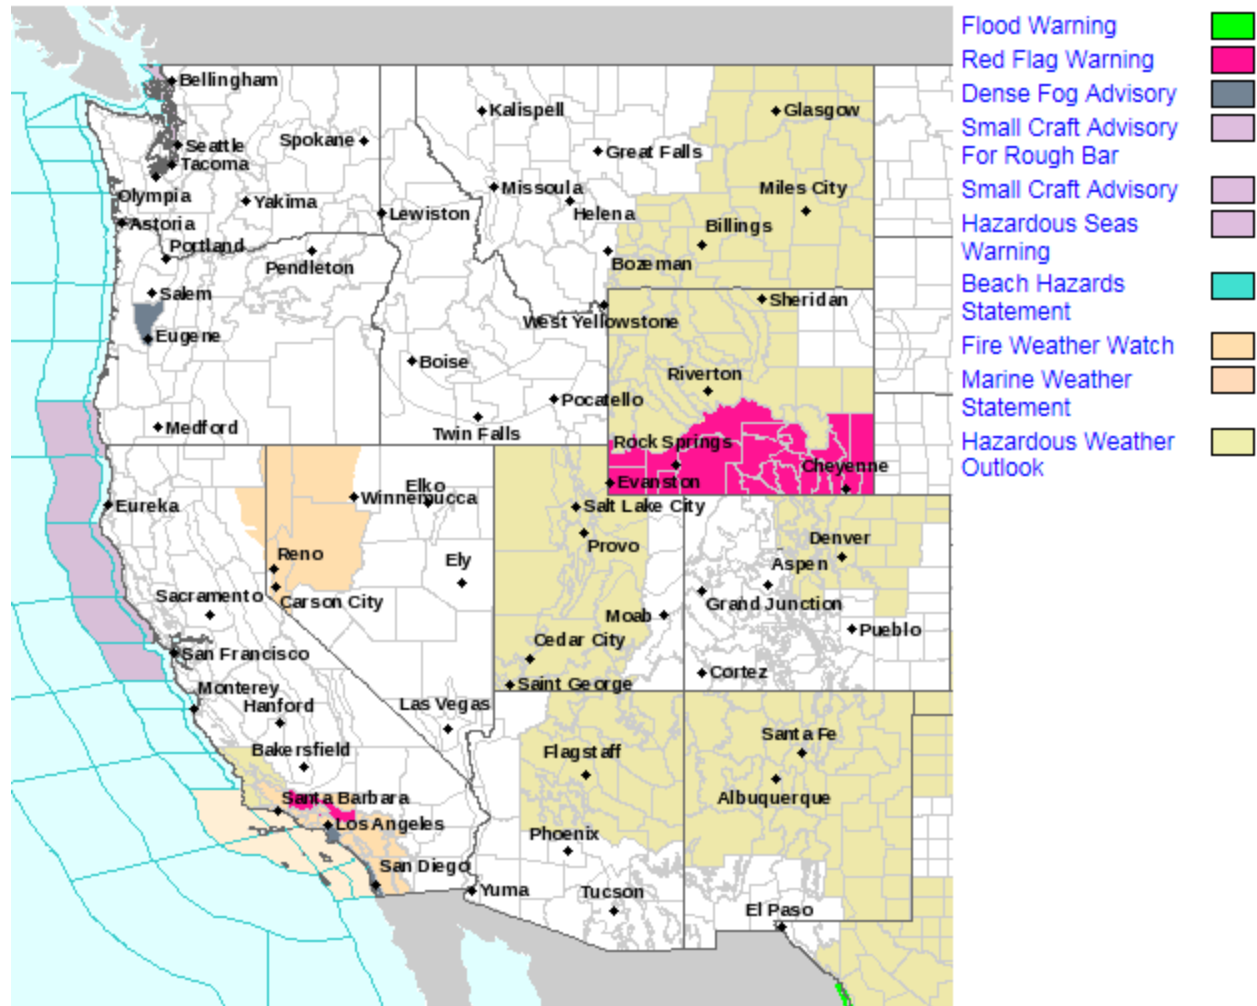

NORTHERN CALIFORNIA

Areas of low relative humidity (RH) and gusty SW to W afternoon winds for the next couple days near and east of the Cascade/Sierra crest. A stronger trough will develop off shore to our NW today, then slowly move ashore and across the Northern California region later Tuesday afternoon through Wednesday night. There will be moderately strong, gusty SW to W winds develop every afternoon during that period near and east of the Cascade/Sierra crest and periods of low RH with that are likely as well. Wind gusts will mostly be 25-30 mph (locally around 35 mph), with the lowest RH values 10-17%. Some light showers of less than wetting rain amounts (below 0.10") may fall over the far N and NE portions of the Geographic Area Wednesday into early Thursday. The trough moves east into the Great Basin Thursday, and high pressure will arrive along the coast and move inland Thursday night and Friday. N to NE winds are expected to develop Friday under this change in weather pattern, but they seem unlikely to become very strong. Nevertheless, they will probably last through the day Saturday to become stronger Saturday night into next Sunday and become more NE to E/offshore next Sunday. RH values will also likely be on a decreasing trend with a reasonably good chance of widespread poor overnight recovery developing in the windy areas next weekend. Afternoon high temperatures will become quite a bit cooler after today, dropping from recent above normal values to equally below normal values (by 7-9 degrees) for many areas Wednesday and Thursday before rapidly returning to near normal or a bit above for next weekend. The warmest inland areas' afternoon highs this week will range from mid and upper 90s today, lowering to around 80 Thursday, and rising to near 90 next weekend.

SOUTHERN CALIFORNIA

Hot and very dry through Monday. Isolated dry thunderstorms across Southern California Monday afternoon. Minimum humidity will be in the single digits and teens. An area of low pressure will approach from the southwest today bringing the chance of isolated thunderstorms to Southern California in the afternoon. Humidity will start off low so any thunderstorm that develops will have little or no rainfall with it. Increasing clouds will cause temperatures to drop around 10 degrees across Southern California today, but abundant sunshine will keep temperatures hot across Central California. A significant increase in humidity will allow thunderstorms to become wet across Southern California tonight and isolated to scattered showers and thunderstorms will continue through Tuesday as the low moves overhead. Some leftover moisture may allow the shower and thunderstorm activity to continue across Southern California through Wednesday afternoon. Isolated showers and thunderstorms will also be possible over the Sierra Tuesday and Wednesday, but the rest of Central California will stay dry. Significant cooling will take place across the entire region Tuesday through Thursday as high pressure moves east and a Pacific trough drops down the West Coast. Temperatures will be well below normal by Thursday. Strong and gusty westerly winds will surface across the mountain ridges and desert passes Wednesday afternoon through Thursday afternoon. A strong ridge of high pressure will build into California from the Pacific Ocean bringing a significant warming trend and very low humidity to the region Friday through next weekend. Strong northerly winds will surface across the South Coast of Santa Barbara and the Grapevine Thursday night and then there will be gusty northeast to east winds across the mountains and below the canyons and passes of Southern California Friday. Winds will become light by next weekend.

WEATHER MAP

Cal OES
GOVERNOR'S OFFICE
OF EMERGENCY SERVICES

Current CAL OES Proclamations

Soberanes, Vegetation Fire, Monterey County

- On 07/26/16, Acting Governor Tom Torlakson issued emergency proclamations for Monterey County due to the effects of the Soberanes Fire.
